

1. **One of the earliest cultures to use flowers were the Egyptians. They valued _____ and _____ .**
 - A Simplicity with variation
 - B Majestic and lavish
 - C Simplicity and repetition
 - D Ornate with gothic tone

2. **_____ play a powerful role in advertising floral shops and in most locations leads all other media in sales return for dollar spent.**
 - A Telephone Sales
 - B Newspapers
 - C Window displays
 - D Radio spots

3. **The following is not a characteristic of an insect:**
 - A Two tentacles
 - B Six legs
 - C Two pairs of wings
 - D Three segmented body

4. **A hue with white added is:**
 - A Tone
 - B Chroma
 - C Tint
 - D Accent

5. **Heavy-headed flowers, such as large mums, often bend by the flower head, nearly breaking off. What should be done to temporarily improve this situation?**
 - A Use wire to tie flower head on
 - B Insert toothpicks pointed through the bloom into the stem
 - C Use string to tie flower head on
 - D Use hot glue gun to glue flower head on

6. **The treatment given Easter lilies to speed flowering is called:**
 - A Drying off
 - B Long days
 - C Precooling
 - D Short days

7. **Damping-off disease of seedlings is caused by:**
 - A Bacteria
 - B Virus
 - C Fungus
 - D Fertilizer

8. **The measure of how poisonous a chemical is after a single exposure is _____ toxicity.**
 - A Chronic
 - B Bad
 - C Acute
 - D Accurate

9. **In order to survive in the florist business, an owner/manager must be able to determine the true value of the product and strive for improvement of the perceived value. This is called**
- A Retail pricing
 - B Profit Pricing
 - C Premium pricing
 - D Discount pricing
10. **The larger the gauge of florist wire indicates that the thickness is:**
- A Thicker
 - B Thinner
 - C Longer
 - D Shorter
11. **A floral arrangement should be finished on all sides if it is to be placed:**
- A On a mantle
 - B In front of a mirror
 - C Against a wall
 - D On a bookcase
12. **Hanging plants used in interior landscapes function to:**
- A Keep people from sitting on the edges of plants
 - B Float in water features
 - C Smooth squared edges found in the architecture
 - D Hide tall, ugly equipment
13. **Most indoor foliage plants need which kind of lighting?**
- A Direct sunlight
 - B Bright indirect light
 - C Medium light
 - D Bright light
14. **Mass production techniques can often be used for all of the following arrangements except**
- A Monthly in store promotions
 - B Corsages for a large wedding
 - C Holiday designs through the wire service
 - D A walk in customer's anniversary flowers
15. **Appropriate refrigeration of cut floral materials involves both temperature and humidity control to:**
- A Increase microbial growth and development
 - B Slow down respiration
 - C None of the above
 - D Increase water lost by transpiration
16. **The acceleration of flowering by manipulation of environmental conditions is known as:**
- A Leaching
 - B After-ripening
 - C Pulsing
 - D Forcing

17. **Growing medium kept too wet will deprive plants of:**
A Soluble salts
B Oxygen
C Fertilizer
D Water
18. **When designing a floral arrangement, after the container has been prepared, one should:**
A Begin filling in
B Establish the focal point
C Establish the lines
D Drain out all the water
19. **Which type of rose has multiple large flowers on a single stem?**
A Grandifloras
B Floribundas
C Hybrid teas
D Polyanthas
20. **A _____ gauge wire is most commonly used for funeral work.**
A 24
B 3
C 28
D 18
21. **An example of a mass flower is:**
A Liatris
B Rose
C Larkspur
D Snapdragon
22. **This design is the easiest for a beginner because it does not require a focal point.**
A Symmetrical
B Round
C Cascade
D Asymmetrical
23. **Demographics can help a florist plan**
A How much local wholesalers will charge
B Which software program will be most effective
C How to calculate sales tax and report income tax
D The type of hard goods they should keep in stock
24. **Costs associated with making an arrangement, decorating a blooming plant, or creating wedding flowers are called _____.**
A Overhead
B Fixed costs
C Indirect costs
D Direct costs

25. **A method of applying pesticides to plants that can be effectively used in greenhouse but not outdoors is:**
- A Fumigation
 - B Spraying
 - C Dusting
 - D Soil drenching
26. **The pH on soil test results stands for:**
- A Acidity
 - B Potential oxygen
 - C Potential hydrogen
 - D Alkalinity
27. **Analogous color harmony utilizes:**
- A Tints, shades and tones of one hue
 - B Two colors directly opposite each on the color wheel
 - C Two or three adjacent colors on the color wheel
 - D A combination of the primary and secondary colors
28. **Commercial flower crops are sometimes watered to cause leaching. This means:**
- A Watering by subsurface methods
 - B Watering to spread fertilizer nutrients more evenly throughout the plant root system
 - C Watering only to wet the top 1/3 of the growing medium
 - D Watering to remove excess soluble salts from the growing medium
29. **When is the best time to divide a mature chrysanthemum?**
- A When it is dormant in the winter
 - B After blooming in the fall
 - C When the plant is not blooming during the summer
 - D When it is about three inches tall in the spring
30. **The three critical responsibilities of a manager in a flower shop include all of the following except**
- A Controlling the buying, use, and sale of products
 - B Advertising and networking the shop
 - C Oversee the flow of money into and out of the business
 - D Supervise people
31. **The most important cut flower crops in the US are:**
- A Gladiolus, orchids, gardenia
 - B Mum, rose, carnation
 - C Rose, snapdragon, gladiolus
 - D Carnation, rose, orchid
32. **All of the following processes will help speed the opening of buds, except**
- A Placing stems in water with bud opening solutions
 - B Stems should be placed in an environment with 60-80% humidity
 - C Stems should be placed in warm temperatures between 70-80 degrees
 - D Misting stems with cold water

33. **Hydrangeas are forced for the following holidays:**
A Thanksgiving, Christmas, Valentine's Day
B Easter, Mother's Day, Memorial Day
C Memorial Day, July 4th, Labor Day
D Secretary's Day, Sweetest Day, President's Day
34. **An organism capable of causing a disease is called:**
A A cambium
B An enzyme
C A Pathogen
D A systemic
35. **The term "texture", as it applies to plants, includes such adjectives as:**
A Entire, serrate, and lobed
B Smooth, fuzzy and spiny
C Corymb, umbel and panicle
D Fine, medium and coarse
36. **Which of the following describes a good plant watering practice?**
A Allowing water to penetrate throughout the pot
B Waiting until plant leaves wilt to water
C Allowing the plant to stand in water
D Keeping soil constantly wet
37. **Mass marketing is the sale of floral products:**
A In large discount stores
B All of these
C In high-traffic locations
D In the supermarkets
38. **The reason for putting irregularly shaped stones or broken pieces of pottery into the bottom of a pot containing flowering plants is:**
A It helps the soil to drain after being watered
B They allow the roots to grow out of the bottom of the pot
C Its just an old tradition passed down from person to person and does not help the plants
D They let air into the pot from the bottom
39. **Potted plants can be dressed up to add value to an order by using all of the following, except.**
A Cellophane
B Baskets
C Speed covers
D Polyfoil or florists' foil
40. _____ is a postharvest technique used to load or fill flowers with sugar and other chemicals, giving them "strength" before they are dry-packaged and shipped long distances.
A Hardening
B Conditioning
C Pulsing
D Bud-Opening Solution

41. **These summer-blooming perennials produce dense, bristly balls of blue color:**
- A Globe thistle
 - B Blue plumbago
 - C Statice
 - D Delphinium
42. **Costs associated with making an arrangement, decorating a blooming plant or creating wedding flowers are called:**
- A Fixed costs
 - B Direct costs
 - C Overhead
 - D Indirect costs
43. **What do you NOT do when flowers arrive from the wholesaler?**
- A Inspect for damage, overheating, and decay
 - B Groom, remove damaged flowers or foliage
 - C Mix preservative at recommended rate in 40-50 degree F water
 - D Wash buckets with bleach or special floral cleaner
44. **When cutting fresh flower stems it is best to cut them with _____ rather than shears.**
- A A pair of scissors
 - B A knife
 - C A set of loppers
 - D Hook and anvil pruners
45. **Irregularly shaped holes with smooth edges appear in Celosia leaves. Some leaves are even missing. The plants should be treated for:**
- A Leaf cutter bees
 - B Crickets
 - C Aphids
 - D Slugs and snails
46. **Upper leaves which show interveinal chlorosis probably suffer from:**
- A An iron deficiency
 - B Lack of water
 - C A sulfur deficiency
 - D A nitrogen deficiency
47. **Which of the following statements is most correct relating to sales in a floral shop?**
- A Internet sales are higher for flower shops that are not located in high-traffic locations.
 - B Online-only floral shops are becoming popular among the floral industry.
 - C Walk-in sales are guaranteed sales due to impulse buyers.
 - D Approximately 80% of sales in a flower shop are made over the telephone.
48. **Characteristic floral arrangements of the Renaissance were flowers arranged in vases so that only the _____ were visible.**
- A Leaves
 - B Stems
 - C Blossoms
 - D fruits

49. **Fertilizer that you add to your flowering plants contains the following elements in the correct order:**
- A Potassium, nitrogen, iron
 - B Nitrogen, phosphorus, iron
 - C Nitrogen, potassium, phosphorus
 - D Nitrogen, phosphorus, potassium
50. **What is a terrarium?**
- A A small dish garden arrangement with plants and cut flowers
 - B A container, usually made of glass, that houses one or more live plants
 - C None of the above
 - D Any potted plant in a decorative cover
51. **The pierce wiring technique works best on flowers that have a _**
- A Thin Calyx
 - B Limp stem
 - C Thick Calyx
 - D Fuller Bloom
52. **Successful advertising to a target audience is based on three profit "P"s. Which one of the following is not part of the three profit "P"s?**
- A Persuasive
 - B Pleasant
 - C Planned
 - D Persistent
53. **The Occidental style of flower arranging began in _____.**
- A Egypt
 - B South Korea
 - C North Korea
 - D Japan
54. **A poinsettia crop that is four weeks late in flowering for Christmas was very likely exposed to:**
- A Lighting at night
 - B A gas leak
 - C An herbicide
 - D Too much CO₂
55. **Certain plants are quite suitable for use in terrariums. Which, if any, of the following are suitable for this use?**
- A Both of these
 - B Creeping fig
 - C None of these
 - D Needlepoint ivy
56. **Deluxe floral foam is used to:**
- A Hold heavy stemmed flowers
 - B Absorb water quickly
 - C Hold soft stemmed flowers
 - D Act as a preservative

57. **A mum cultivar with a single flower more than 4 inches in diameter, having all lateral buds removed is called a**
- A Standard mum
 - B Spray mum
 - C Disbud mum
 - D Miniature mum
58. **Sales and income revenue are highest for retail flower shops during what part or parts of the year?**
- A Summer months due to weddings
 - B Thanksgiving and Christmas seasons
 - C January to May
 - D October through May
59. **A palmately compound leaf has:**
- A Parallel venation
 - B A rachis
 - C Leaflet
 - D A midrib
60. **Flowers, which are worn by men and pinned on a lapel, are called:**
- A Falcon corsage
 - B Potpourri corsage
 - C Boutonnieres
 - D Hand-tied bouquet
61. **Your orchids are facing a pest problem. The buds, flowers and tender new growth are pitted or stunted. Tiny insects are often visible. A sticky fluid secreted by the insects provides a medium for growth of sooty mold and attracts ants. The most likely problem is _.**
- A Mealybugs
 - B Aphids
 - C Snails and slugs
 - D Spider mites
62. **There are three basic "C" aims for selling in a flower shop. Which of the following is NOT included in the three "C"s?**
- A Create an interest
 - B Contain the cost
 - C Convince the customer
 - D Close the sale
63. **Which of the following is NOT important for a floral designer to ask when designing arrangements for a specific room?**
- A How many table will there be?
 - B What is the ceiling height?
 - C What percent of the budget does the room cost
 - D What size is the room?

64. **Air layered plant are removed from the parent plant:**
A When the plants are sold
B Immediately after layering
C As soon as the roots are visible
D When the roots are four to six inches long
65. **A more expensive decorative container into which a potted plant can be set is a:**
A Rose bowl
B Vase
C Jardinière
D Quick sleeve
66. **Plant lice refers to:**
A Mites
B Aphids
C Scale
D Thrips
67. **When black is added to a hue, the resulting color is called a:**
A Tone
B Hue
C Shade
D Tint
68. **Another name for rose stripper is**
A Destripper
B Dethorner
C Deleafer
D Clipper
69. **As the art of floral design has become more formalized through practice, teaching and writing; there has developed a group of traditional guidelines that are frequently cited by people involved in flower arranging. Which of the following, if any, is part of these traditional guidelines?**
A Neither of the above
B Keep flowers from lining up in distracting patterns
C Both of the above
D Avoid crossing lines and lines that change abruptly
70. **If you have a work related problem that you do not know how to solve, you should take it to your supervisor:**
A For him/her to solve
B To complain about it
C After you have tried a solution
D With alternative solutions
71. **This element is essential for strong stems, strong roots, and deep flower color. A deficiency in plants shows up as weak stems, and a yellowing and browning of leaves at their tips and edges.**
A Potassium
B Nitrogen
C Iron
D Phosphorus

72. **The flower part that contains the pollen is the:**
- A Filament
 - B Anther
 - C Ovary
 - D Corolla
73. **The stomata of a plant leaf:**
- A Must open to allow light to reach the chlorophyll for photosynthesis
 - B Prevent disease organisms from entering the plant
 - C Regulate water vapor loss from the plant
 - D Regulate nutrient entry from foliar fertilizer applications
74. **To insure blue color in hydrangeas, you would:**
- A Fertilize with magnesium sulfate
 - B Expose the crop to short days and cool nights
 - C Raise the pH level in the soil
 - D Fertilize with aluminum sulfate
75. **Honeydew on the leaves and ants crawling around a plant indicate:**
- A Fungus
 - B Aphids
 - C Thrips
 - D Slugs
76. **The greatest control over the cooling phase of Easter lily production is provided by**
- A Commercial care cooling
 - B Fan and pad cooling
 - C Natural cooling
 - D Controlled temperature forcing
77. **According to sales figures, what is the most popular cut flower sold in the United States?**
- A Rose
 - B Carnation
 - C Poinsettia
 - D Chrysanthemum
78. **Size of a casket spray is determined by:**
- A Religious affiliation
 - B Budget
 - C Type of flowers in season
 - D Type of casket
79. **A florist is most likely to be promptly paid when charged account bills are mailed:**
- A Bi-weekly
 - B Monthly
 - C Weekly
 - D The day after purchase

80. **When all designs, colors, and flowers have been decided upon by the customer, the sale should be closed with**
- A A hand shake
 - B An invoice of sale
 - C A complete payment
 - D A promise from the florist to deliver the design on time
81. **An explant is:**
- A Weed
 - B Plant produced from a leaf
 - C Dead plant
 - D Plant produced from a tissue (meristem)
82. **When cutting roses to use indoors or to remove spent blossoms:**
- A Do not leave at least two good leaves of the stem
 - B Make the cut above the first strong, three-leaflet leaf
 - C Cut directly below the first strong, three-leaflet leaf
 - D Cut directly below the first strong, five-leaflet leaf
83. **A major problem in standard carnation production resulting in asymmetrical flowers is:**
- A Calyx splitting
 - B High-density spacing
 - C Lack of pinching
 - D Improper fertilization
84. **A design that uses a combination of both natural and manmade materials in an unnatural manner to create a new image is called a:**
- A Parallel design
 - B Pave' design
 - C Interpretive design
 - D Line flower
85. **The florist's chrysanthemum is a _____.**
- A Composite inflorescence
 - B Complex hybrid
 - C All of these
 - D Short day plant
86. **The term hard good means:**
- A What happens to floral foam after it is used and dries out
 - B Cut flowers are stored at improper temperatures and harden
 - C Nonperishable items used in designing such as containers
 - D Nonperishable items used in designing such as flowers and foliages
87. **Cool colors include color combinations like:**
- A Black, white and green
 - B Red, red-orange, orange, yellow-orange, yellow
 - C Blue-green, blue, blue-violet and violet
 - D Yellow, pink and red

88. **Texture in an arrangement refers to:**
- A The visual path the eye follows when viewing the arrangement
 - B The surface appearance of the arrangement
 - C The shape or silhouette of the design
 - D the blending of components of an arrangement
89. **Color can be used in a design to achieve all of the following except**
- A Emphasis or focal point
 - B Depth and rhythm
 - C Harmony and unity
 - D Proportion
90. **The pricing method based on 40% of retail selling price is:**
- A Nesting pricing
 - B Wholesale pricing
 - C Retail cost of goods
 - D Ratio markup
91. **To properly water indoor plants, consider:**
- A The type of plant
 - B All of the above
 - C Where the plant is growing
 - D The size of the plant
92. **Kitty litter, cornmeal, sand and borax are all types of:**
- A Stabilizers
 - B Preservatives
 - C Desiccants
 - D Accessories
93. **Pre-formed pot covers used on potted plants are called**
- A Quick wraps
 - B Speed covers
 - C Mylar tops
 - D Picks
94. **Which of the following is not generally considered part of the Floriculture Industry?**
- A Potted foliage plants
 - B Commercial cut flower greenhouses
 - C Retail flower shop
 - D Vegetable transplants
95. **The function (s) of floral preservatives is (are) to:**
- A Supply a bactericide
 - B Acidify the solution
 - C All of these
 - D Provide sugar

96. **The characteristics of a formal arrangement include all but one of the following. Identify the characteristic which is NOT normally associated with a formal arrangement.**
- A Textures are smooth, shiny or velvety
 - B Arrangement may be placed off-center
 - C Flowers used include roses, orchids and carnations
 - D Arrangement is usually symmetrically balanced
97. **If a florist was limited to two tools, the least useful ones to have would be:**
- A Sharp knife and floral shears
 - B Ribbon and anchor tape
 - C Pruning shears and wire cutters
 - D Oasis and cardettes
98. **When mixing preservatives for cut flowers, the preservative should be mixed in _____ water.**
- A 85-95 degree F
 - B 50-60 degree F
 - C 100-110 degree F
 - D Below 45 degree F
99. **All but one of the following is easily suitable for pressing. Which item is NOT suitable for pressing.**
- A Pansies
 - B Daffodil
 - C Dusty miller
 - D African violets
100. **The number one foliage production state in acres and wholesale value is _____.**
- A Texas
 - B Florida
 - C Hawaii
 - D California
101. **The number of flowers usually in a cymbidium orchid corsage is:**
- A One
 - B Three
 - C Four
 - D Two
102. **When a florist greens an arrangement, they are:**
- A Adding in green flowers in honor of St. Patrick's Day
 - B Adding foliage to it so that the mechanics are hidden
 - C Adding green dye so that the stems are hidden
 - D Removing foliage from the lower stems of the greenery
103. **Generally, roses are graded according to _____ of stem.**
- A Strength
 - B Width
 - C Turgidity
 - D Length

104. **A number 9 florist ribbon is:**
- A 2" wide
 - B 7/8" wide
 - C 2 3/4 " wide
 - D 1 3/8 " wide
105. **In traditional arrangements, materials with higher visual weight are used lower in the arrangement to create stable effect; they are sunken a little further into the arrangement for depth. Identify the significant principles of design that are related to balance:**
- A Color & tone
 - B Stability & depth
 - C Lighting & distance
 - D Size & shape
106. **What type of water supply do cut flowers need to transport food and to keep the stems stiff?**
- A Periodic water supply
 - B Cold water supply
 - C Constant water supply
 - D Occasional water supply
107. _____ **is generally added to water when processing flowers in a retail floral shop.**
- A Algaecide
 - B Insecticide
 - C Herbicide
 - D Biocide
108. **To develop a focal point you should:**
- A All the these
 - B Use form flowers
 - C Use larger flowers
 - D Use darker colored flowers
109. **The word photoperiod has to do with light:**
- A Duration
 - B Quality
 - C Intensity
 - D Foot candles
110. **A good substitute for sand, this material provides for aeration in the growing media:**
- A Perlite
 - B Peat moss
 - C Compost
 - D Rock wool
111. **The _____ method of wiring is commonly used to wire flowers having large, thickened calyxes such as carnations and roses.**
- A Looping
 - B Piercing
 - C Insertion
 - D Hook

112. _____ is the useful lifespan of cut flowers.
- A vase life
 - B cooler life
 - C sale period
 - D shelf life
113. The principle of total compatibility of all parts of an arrangement with each other is termed:
- A Rhythm
 - B Harmony
 - C Proportion
 - D Texture
114. A wire service:
- A Is a company that manufactures wires for floral design
 - B Is a service that sends telegrams
 - C is a company that sends sentiments to be attached to wires
 - D Is a clearinghouse of floral order
115. Visual balance is achieved by the proper placement of plant materials according to _____.
- A Texture and tint
 - B Size and shape
 - C tone and value
 - D Color and size
116. What are two key elements in increasing sales and building wedding business for the retail florist?
- A Promotion and advertising
 - B Planning and preparation
 - C Word of mouth and happy clients
 - D Season and unique designs
117. Japanese style of floral arrangement is known as:
- A Yen
 - B Ikebana
 - C Ikenobo
 - D Yin
118. Specialty cut flowers may be defined as:
- A Cut flowers other than those grown in the field.
 - B Cut flowers other than roses
 - C Cut flowers other than roses, carnations and chrysanthemums
 - D Cut flowers other than carnations, chrysanthemums and gladiolus
119. Focus in floral design refers to:
- A Attraction of the observer's eyes to the outline form of the arrangement
 - B A gradation of sizes of flowers
 - C Attraction of the observer's' eye to a central point
 - D Transition from dark to central point

120. In order to keep potted plant leaves clean, florists should:
- A None of the above
 - B Water with a sprayer hose in the store
 - C Wipe leaves with a soft damp towel
 - D Use leaf shine regularly
121. A flowering pot marketed throughout the year is:
- A Poinsettia
 - B Easter Lily
 - C Chrysanthemum
 - D Geranium
122. _____ is the act of cutting flower stems properly and providing them with the proper treatment at any stage of the distribution process.
- A Slicing
 - B Cleaning
 - C Processing
 - D Producing
123. The bract that encloses a flower cluster is a .
- A Quill
 - B Spike
 - C Petal
 - D Spathe
124. A consumer tracking study over floral trends showed that on average ____ of floral sales, excluding holiday sales, were not for any special occasion.
- A 0.1
 - B 0.8
 - C 0.25
 - D 50%
125. Nosegay originated during which period in the history of floral design:
- A Baroque
 - B English-Georgian
 - C Renaissance
 - D Victorian
126. When ordering flowers from a wholesale florist, one should consider the following:
- A Availability
 - B Keeping quality
 - C All of these
 - D Price
127. IPM is an acronym for:
- A Intensive pest management
 - B Integrated pest material
 - C Integrated pest management
 - D Intensive pest material

128. The term used to describe an item used in a floral design that will not die is called a(n) _____ item.
- A Accessory
 - B Expensive
 - C Perishable
 - D Non-perishable
129. A common foliage used for sympathy pieces is
- A Commodore or Parlor Palm
 - B Flat fern
 - C Lemonleaf
 - D Leatherleaf
130. Transition in a floral arrangement is the process of rhythmic change through progression, sequence, or
- A Separation
 - B Gradation
 - C Restructuring
 - D Modification
131. There are three main ingredients in floral preservatives. Which of the following is not one of these ingredients?
- A Algaecide
 - B Bactericide
 - C Caking agent
 - D Acidifying agent
132. Distorted flowers characterized by shorter petals, which give the rose a flattened appearance are called:
- A Flagged
 - B Blind shoots
 - C Deadheads
 - D Bullheads
133. The best way to water potted plants with velvet leaves is:
- A With a shower setting nozzle on a water hose
 - B By sitting it in a sink and running water over the plant
 - C By placing water in a saucer or liner and allowing the plant to absorb what it needs
 - D By allowing the plant to dry out completely and lightly misting the plant
134. A roll of ribbon is known as _____.
- A Streamers
 - B A Bolt
 - C A Roll
 - D A Reel
135. The main reason many tropical foliage plants decline indoors is related to:
- A Humidity
 - B Light
 - C Temperature
 - D Air circulation

136. **A person is exposed to the highest concentration of a pesticide during:**
- A Mixing
 - B Clean equipment
 - C Reading directions
 - D Application
137. **All of the following are bulbous and tuberous-rooted plants except:**
- A Dahlias
 - B Dutch iris
 - C Caladiums
 - D Snapdragons
138. **The most important environmental factor in orchid culture is:**
- A Temperature
 - B Watering and water quality
 - C Fertilization
 - D Light
139. **A florist is making a hand-tied bouquet; what contemporary design style will he/she use to unite the materials together?**
- A Binding
 - B Bundling
 - C Banding
 - D Wrapping
140. **The first major civilization to have professional floral designers was the:**
- A Chinese
 - B Egyptians
 - C Romans
 - D Greeks
141. **The following florist crops are propagated by cuttings:**
- A African violet, cut leaf philodendron, English ivy, Sprengeri asparagus fern
 - B Snapdragons, stock, Boston yellow daisy, gardenia
 - C Carnation, chrysanthemum, poinsettia, azalea
 - D Hydrangea, Easter lily, rose, orchid
142. **What nutrient is deficient if the deficiency symptoms are found on older/lower leaves and the plant is dark green or reddish- purple with short, slender stalks?**
- A Nitrogen
 - B Phosphorus
 - C Potassium
 - D Iron
143. **Which of the following is true regarding rental of common event items such as arches or pillars?**
- A Florists should never rent these items
 - B They are typically offered free of charge
 - C They typically require a deposit and rental fee per item
 - D In order to make a profit, the full cost of goods should be charged to the customer for each rental

144. **It is important not to keep fruit baskets in the same cooler with fresh flowers because:**
- A Ethylene gas from the fruit will cause the flowers to age quickly
 - B Florists shouldn't sell fruit - that's the job of the grocery store
 - C Banana and apples give off an odor that is absorbed by the flowers
 - D Fruit flies eat flower petals
145. **This citric acid solution causes flowers to take up water rapidly to prevent dehydration after flowers have been dry packed.**
- A Floral Preservative
 - B Orange juice
 - C Hydrating solution
 - D Sanitizer
146. **A contemporary design style that uses clustering placed at the base of a design to resemble hills or clouds is known as**
- A Stacking
 - B Grouping
 - C Pillowing
 - D Tufting
147. **Short, crooked rose peduncles often result from**
- A Botrytis blight
 - B Excessive vigor
 - C Excessive soluble salts
 - D Calcium deficiency
148. **Which of the following is NOT important when considering water quality for fresh flowers?**
- A Temperature
 - B Salinity
 - C pH
 - D Hardness/softness
149. _____ **is the ribbon size typically used for corsage work.**
- A #3
 - B #9
 - C D) #40
 - D #16
150. **The flowers and leaves of a rose are mottled and streaked with silver, and dusty black droppings have collected. This damage is indicative of:**
- A Fungus gnats
 - B Thrips
 - C Powdery mildew
 - D Scale
151. **Containers that depict a holiday, season/ theme or articles such as plush animals are known as**
- A Accessories
 - B Seasonals
 - C Decorations
 - D Novelties

152. **The new growth of a Dieffenbachia is weak and spindly, with large gaps between the leaves. The problem is probably:**
- A Nitrogen deficiency
 - B Botrytis
 - C Salt damage
 - D Lack of light
153. **When utilizing the ratio markup method a 5 to 1 item with the total wholesale value of the material costing \$12.00 would retail for _____.**
- A None of these
 - B \$30.00
 - C \$45.00
 - D \$60.00
154. **An arrangement should be at least _____ times the height of a tall container or the width of a low elongated container.**
- A 1
 - B 1 ½-2
 - C 2 ½
 - D 3
155. **Which of the following designs is not suitable for a wedding?**
- A Kneeling bench arrangement
 - B Two-tiered guest table arrangement
 - C Full couch spray arrangement
 - D Cascade bouquet arrangement
156. **Which of the following is NOT a primary principle of design:**
- A Accent
 - B Rhythm
 - C Proportion
 - D Dominance
157. **Plant texture is determined by _____.**
- A both foliage density and plant shape
 - B plant shape
 - C the way the leaf feels to the touch
 - D foliage density
158. **The primary colors are:**
- A Red, yellow, and blue
 - B Orange green and violet
 - C Blue, orange, and violet
 - D Red, green and blue
159. **Floral arrangements designed with visual paths along which the eye is led from one point of interest to another are called**
- A Line arrangements
 - B Abstract arrangements
 - C Naturalistic arrangements
 - D Mass arrangements

160. **The Oriental style of flower arranging began in _____.**
A Japan
B America
C India
D China
161. **Secondary colors consist of:**
A Yellow, red, and blue
B Orange, green, and violet
C None of the above
D Orange, blue-violet, and blue-green
162. **More plants die from _____ than any other cause.**
A Overwatering
B Lack of fertilizer
C Lack of water
D Insects
163. **Which type of plant would be most likely to tolerate lower light intensity?**
A Plants with light colored leaves
B Plants with dark green leaves
C Plants with variegated leaves
D Plants with colorful leaves
164. **A speckled leaf appearance with fine silky strands between leaves and on lower leaf surfaces suggests the presence of:**
A Damping-off
B Botrytis
C Mealybug
D Spider mite
165. **Gloxinia and African violet are members of the plant family:**
A Asteraceae
B Caryophyllacea
C Fabaceae
D Gesneriaceae
166. **There are three basic types of pots that are commonly used in the greenhouse industry. Which of the following is not one of the basic types?**
A Standard pot
B Azalea pot
C Designer pot
D Bulb pot or pan
167. **Gladioli are:**
A Used a 'line' flowers in a floral design
B Seldom used by florists
C Poor keepers
D Come in only two colors

168. **The design that consists of several layers of materials, varying in size and texture to create a flowering effect is called a:**
- A Naturalistic design
 - B Round design
 - C Pave' design
 - D Cascade design
169. **Which period in the history of floral design scattered roses on the tables and floor at banquets?**
- A Romans
 - B Ancient Greeks
 - C French
 - D Byzantine
170. **A process in which flower bunches are packaged in protective paper or polyethylene coverings to protect and separate flower heads, prevent tangling, and aid in identification is called**
- A Stacking
 - B Packing
 - C Stocking
 - D Sleeving
171. **When making an English Georgian type arrangement it should be?**
- A Casual and open
 - B Formal and symmetrical
 - C Proportioned and compact
 - D Elegant and flamboyant
172. **The asymmetrical balanced design of few materials, usually placed in groups that emphasize forms and lines is called a:**
- A Vegetative design
 - B Pave' design
 - C Parallel design
 - D Formal linear design
173. **The average humidity recommended for interior plants is:**
- A 20 to 30%
 - B 70 to 100%
 - C 10 to 20%
 - D 40 to 70%
174. **The adjustment of a plant from production conditions to interior conditions is called:**
- A Light metering
 - B Photosynthesis decline
 - C Humidity
 - D Acclimatization
175. **If a flower arrangement appears to be ready to fall over, it lacks:**
- A Rhythm
 - B Balance
 - C Focus
 - D Harmony

176. **A 'stretched' plant is one that:**
- A Is a vine
 - B Produces flowers beyond its natural flowering time
 - C Has grown excessively long stems
 - D Has taken too long to reach marketable size
177. **To create a strong focal point, a designer should _____ at the focal point.**
- A Use flowers with a bright chroma
 - B Use tight buds so the flowers will last longer and make a more dramatic effect
 - C Space the flowers farther apart
 - D Place flowers closer together
178. **The most commonly used material for holding flowers is:**
- A Frogs
 - B Pin point holders
 - C Floral foam
 - D Chicken wire
179. **Flowers such as roses and carnations should be stored at:**
- A 45-50 degrees F
 - B 36-40 degrees F
 - C 55-60 degrees F
 - D 30-35 degrees F
180. **A correct way to remove mealybugs from plants is:**
- A Use a pesticide
 - B Use a fungicide
 - C Dab each bug with a cotton swab dipping in rubbing alcohol
 - D Rinse the leaves with milk
181. **Which of the following sympathy floral designs are more symbolic and based on forms of specific shapes?**
- A Standing sprays
 - B Set pieces
 - C Inset pieces
 - D Casket sprays
182. **Flowers are subject to chilling injury at temperatures below _____ degrees F.**
- A 60
 - B 50
 - C 59
 - D 71
183. **Which of the following statements best describes a dish garden?**
- A A mass of green plants placed in a wicker basket to resemble a miniature garden.
 - B A single green plant placed in a low container.
 - C A single blooming plant placed in a wicker basket.
 - D A mixture of small, living green or blooming plants suited for tabletop display.

184. Which of the following is a true statement?
A The lower the number, the thinner the wire and wider the ribbon.
B The lower the number, the thinner the wire and narrower the ribbon.
C The lower the number, the thicker the wire and narrower the ribbon.
D The lower the number, the thicker the wire and wider the ribbon.
185. A zinnia is an example of a flower having a _____ texture.
A Medium
B Shiny
C Coarse
D Fine
186. A brown foam which is easily penetrated by delicate floral stems and aids in the arrangement of silk and dry flowers is _____.
A Silica gel
B Holdfast
C Dry foam
D Styrofoam
187. What is a good sign that potted plants need to be repotted?
A The plant is becoming tall and lanky
B New leaves are quite a bit smaller than older ones
C New leaves are quite a bit larger than older ones
D Leaves are turning yellow
188. A group of orchids have a problem caused by improper culture. The foliage is dark green and healthy, but the plant won't flower. The probable cause is _____.
A Insufficient humidity
B Over fertilization
C Too little light
D Under watering
189. The Hogarth "S" design was made in which period?
A Byzantine
B Empire
C Baroque
D English- Georgian
190. Which of the following can be a negative effect of using leaf shine often on potted plants?
A Blocking of leaf stomata
B Depletes nutrients
C Prevention of photosynthesis
D Keeps leaves shiny
191. Fungus gnat damage to potted plants is caused by the _____.
A Adult stage
B Larval stage
C All of the above
D Pupal stage

192. **A design that uses a complementary color scheme is one that:**
- A Uses flowers in various tints and shades of one color
 - B Combines all colors
 - C Uses colors that are opposite to one another on the color wheel
 - D Uses colors closely related to one another on the color wheel
193. **What type of plants are best suited for closed system terrariums?**
- A Cacti
 - B Tropical plants
 - C Succulents
 - D Flowering plants
194. **For optimum vase life, most cut flowers should be stored at temperatures close to:**
- A 50 °F
 - B 30 °F
 - C 40 °F
 - D 45 °F
195. _____ **is used to secure the floral foam to the design container.**
- A Floral tape
 - B Electrical tape
 - C Masking tape
 - D Anchor tape
196. **The term that refers to all the petals of a flower collectively is:**
- A Corolla
 - B Stamens
 - C Styles
 - D Sepals
197. **The principles of design are fundamental truths that have evolved as the various art forms have developed. Which of the following is NOT among the major principles of design?**
- A Scale
 - B Price
 - C Balance
 - D Emphasis
198. **Vase life is the length of time that:**
- A A glass vase can be expected to go unbroken
 - B Cut flowers usually remain acceptable
 - C A plastic vase will remain watertight
 - D A flower container remains in style

- A Interpretive design
 - B Cascade design
 - C Vegetative design
 - D Pave' design

- 200. Foliage below the water line should be removed to:**
- A All of these
 - B Prevent photosynthesis
 - C Prevent the leaves from decaying, which foul the water
 - D Prevent leaves from using stored food in the stem
- 201. This spray can be applied to flowers to reduce water loss due to transpiration.**
- A Sealer
 - B Anti-transpirant
 - C Floral tint sprays
 - D Spray glue
- 202. The small handheld bouquets often called Tussie- Mussies were popular in which period.**
- A Dutch-flemish
 - B English-Georgian
 - C Renaissance
 - D Greek
- 203. The majority of florist businesses are conducted in one location and annual gross sales are generally under:**
- A \$2,500
 - B \$250,000
 - C \$25,000
 - D \$2,500,000
- 204. What mechanical tool can be used with a glass vase to stabilize flowers?**
- A A grid made of plastic or anchor tape
 - B Binding wire
 - C Floral tape
 - D Floral wire
- 205. The size of the bow for a corsage should be:**
- A Slightly wider than the petals of the corsage
 - B ½ the length of the corsage
 - C Four inches
 - D As wide as the corsage is long
- 206. What is the biggest difference between pricing wedding work and regular daily sales?**
- A Cost of products
 - B Tax structure
 - C More labor is required
 - D Mark ups aren't used
- 207. When constructing a chaplet for a flower girl, it is helpful for the florist to have this piece of information.**
- A The age of the flower girl
 - B The head circumference measurement
 - C The dress size of the flower girl.
 - D The likes and dislikes of the flower girl

208. Flower stems should be cut approximately at a _____ angle.
- A 90 degree
 - B 180 degree
 - C None of the above
 - D 45 degree
209. Optimum temperatures for poinsettia growth would they are purchased and placed indoors is
- A 50-60 degrees
 - B 60-80 degrees
 - C 45-55 degrees
 - D 70-90 degrees
210. The *Alstroemeria* is most closely related to the following plant:
- A *Abutilon*
 - B *Chrysanthemum*
 - C Easter lily
 - D Daffodil
211. Overhead costs include everything not accounted for in:
- A Indirect costs
 - B Rebates
 - C Direct costs
 - D Taxes
212. A _____ is a floral piece commonly displayed at funerals.
- A Standing spray
 - B Frame
 - C Corsage
 - D Boutonniere
213. If a hue is diluted with gray, the resulting color is called:
- A Tint
 - B Shade
 - C Value
 - D Tone
214. A grouping of closely spaced flowers, net and accessories in a hand-held floral arrangement is called:
- A Corsage
 - B Nosegay
 - C Pompon
 - D Hogarthian curve
215. Cut carnations are classified into two groups:
- A Floral and greenhouse
 - B Standards and miniatures
 - C Premium and discount
 - D None of the above

216. **When completing flowers for a wedding you may work with all but one of the following arrangements except**
- A Cascade bouquet arrangement
 - B Kneeling bench arrangement
 - C Full couch spray arrangement
 - D Two-tiered guest table arrangement
217. **The timing of an Easter lily crop is complicated because:**
- A The earlier the date of Easter, the longer it takes to force them
 - B The size of the rooted cuttings determines the date of flowering
 - C The seeds germinate irregularly over a long period of time
 - D All of these

227. **_____ is the method of placing materials closely together at the base of the design so that individual components are indistinguishable.**
- A Paving
 - B Grouping
 - C Clustering
 - D Tufting
228. **An arrangement should be _____ times the height of a tall container or the length of an elongated container.**
- A 3 to 4
 - B 1.5 to 2
 - C $\frac{1}{2}$
 - D 5 to 6
229. **When planning for a wedding, there are basic considerations that the florist must address in order to properly assist the bride for this important occasion. Which, if any of the items below are NOT one of these factors?**
- A Method of payment
 - B Time of year
 - C Location of wedding
 - D Formality of wedding
230. **How many essential nutrients are essential to plant growth and reproduction?**
- A Three
 - B Four
 - C Six
 - D Sixteen

231. _____ is the interrelationship of all the parts of an arrangement; flowers, foliage, accessories, and container.
- A Unity
 - B Proportion
 - C Scale
 - D Balance
232. This fungus attacks a wide variety of ornamental plants, probably causing more losses than any other single pathogen.
- A Phytophthora
 - B Botrytis cinerea
 - C Pythium root rot
 - D Alternaria
233. Of the following, which gauge of wire has the thinnest diameter?
- A 18
 - B 22
 - C 36
 - D 24
234. Wooden picks are used to:
- A Used to secure the chicken wire to the foam
 - B Secure frogs to the container
 - C Secure the floral foam to the container
 - D Used to extend and strengthen the stems of flowers for insertion into the floral foam
235. Cut branches of evergreen 20-30 inches long are called:
- A Tips
 - B Bales
 - C Boughs
 - D Bunches
236. A cash and carry shop is also known as this kind of flower shop.
- A Carriage Trade Shop
 - B Wholesale Shop
 - C Specialty Shop
 - D Stem Shop
237. To check if a plant needs water, touch the soil with your finger: if the plant needs water the soil will feel:
- A None of these
 - B Dry and warm
 - C Gritty
 - D Cool and moist
238. The hook method of wiring for floral arrangements is used for _____.
- A roses
 - B tubular flowers
 - C delicate flowers
 - D flat headed flowers

239. **With the exception of the horizontal design, how high in relation to its width should a design be made?**
- A 1-1/2 to 2 times the width
 - B 1 to 1-1/2 times the width
 - C 2 to 2-1/2 times the width
 - D 2-1/2 to 3 times the width
240. **The sales showroom is separate from the work area. It should be neat and appealing with adequate floor space for customers to move about. Which of the following features is NOT typical of a sales area?**
- A Wrapping / sales counter with cash register
 - B Consultation area with table and chairs
 - C Display refrigerator holding completed arrangements and cut flowers for sale
 - D Design table for making arrangements
241. **When making hand-tied bouquets, the stems should be positioned:**
- A Parallel to each other
 - B Perpendicular to each other
 - C Any way that looks nice and holds together
 - D In a spiraling manner
242. **Fertilization in a flower takes place when:**
- A Pollen grain touches the ovary
 - B Pollen is released from a flower
 - C Pollen grain touches the stigma
 - D A sperm and egg unite
243. **The blending of all components of a design is known as?**
- A Harmony
 - B Progression
 - C Transition
 - D Unity
244. **The most common stem support mechanic used by florists in fresh cut flower arrangements is:**
- A Needlepoint holder
 - B Chicken wire
 - C Dry foam
 - D Floral foam
245. **Plants need which part of the visible spectrum for good foliage development?**
- A Blue
 - B Green
 - C All of the visible spectrum
 - D Red
246. **Abnormally streaked or striped flower petals are a symptom of 'flower breaking'. This problem is common tulips, lilies and gladiolus and is caused by:**
- A Viruses
 - B Aphids
 - C Thrips
 - D Fungi

247. A container often used at Thanksgiving for floral arrangements and symbolic of a plentiful harvest is the:
- A Bud vase
 - B Basket
 - C Cornucopia
 - D Hanukkah
248. Nosegays were created in the _____ period to help mask the smells of body odor in a society where bathing often was not believed to be healthy.
- A Victorian
 - B English Georgian
 - C Baroque
 - D French
249. The highest percentage of florist industry sales are made by:
- A None of these
 - B Regular customer
 - C Walk-in customer
 - D Telephone
250. The area within a composition occupied by material is called _____.
- A Positive space
 - B Line
 - C Texture
 - D Negative space
